

LAKES BASIN PROJECT

Please come and join the Beckwourth Ranger District to learn about the Lake Basin Project and share your ideas. This project intends to promote healthy and resilient landscapes. The District is holding several open house meetings in order to discuss the Lakes Basin project with the public.

In order to achieve this goal the Lakes Basin project is proposing the following actions:

- Improve forest health by thinning trees.
- Improve aspen health by removing conifer trees within aspen stands
- Remove conifers within meadows
- Reintroduce fire within fire adapted landscapes
- Improve Sierra Nevada Yellow-Legged frog habitat by mitigating creek crossings and reducing road and trail impacts.
- Provide sustainable recreation opportunities by adding trails to the current network of system trails, improving parking at trailheads and removing hazard trees in developed recreation sites.

Please contact Kyla Sabo at (530) 836-2575 for more information or with any special needs related to accessibility and/or information regarding this project (kylasabo@fs.fed.us).
